**RESPONSE AND AMENDMENT UNDER 37 C.F.R. §§1.111**

Assistant Commissioner for Patents  
Washington, DC 20231

Sir:

This Response is submitted under 37 C.F.R. §§1.111 in response to the March 6, 2002 Office Action. A Petition For Extension of Time to extend the time for response for three months until September 6, 2002, and fees to cover the Petition and added claims accompany this Response. Please enter the following amendments.

**In the Specification:**

Please replace the paragraph beginning on line 15 of page 5 with the following:

A,  
Framework 12 preferably comprises a variety of additional features to simplify manufacture and to increase the utility of the liftgate system 10. For example, side plates 14 may comprise formed steps 51, pump bracket 52 for mounting pump 54 to power hydraulic cylinder 38, dock bumpers 56 and vehicle light brackets 58. Generally, these features are integral with the framework 12 but they can also be separate members that are suitably attached to the frame. Also preferably, lift frame tube 22 is configured to function as an underride guard to minimize injury in the event of a rear end collision. Integrating underride protection into the existing liftgate system removes the need for an additional, dedicated horizontal member.
